

COMMUNITY INU (CTI) WHITEPAPER

WHAT IS COMMUNITY INU?

Community Inu is an advanced project that harnesses the power of peer-to-peer digital currency and open-source innovation. It utilizes blockchain technology to ensure accountability and trust in its transactions and operations. The project was launched on **September 01, 2023**, with a vision to transform the future of finance and online commerce by enabling the digitization of money.

Community Inu appears to be a project or platform that combines various elements such as NFT characters, Web3 gaming, travel & tourism, and social Media Reward Program.

Community Inu facilitates accessible, convenient, and high speed transactions across the globe by providing a reliable platform for cryptocurrency exchange and utilization.

It can tap into the potential of smart contracts technology, secondlayer software, and decentralized application developments to offer various services and solutions to its users. Community Inu is a straightforward, utility token, with a strong focus on its community and user base, who can benefit from its features and rewards.

Total Supply: 8.8 Million

Contract Address: 0x6B4B961391fe2b1b2B5B7ae6dA87bC95831448E0

Why we chose Binance Smart-Chain:

We wanted to set the reward system for holders. We had chosen Binance Smart Chain because it offers cheap transactions that make staking more profitable and accessible for our community.

COMMUNITY INU (CTI) WHITEPAPER

We selected Binance Smart Chain because we wanted to involve our project with NFT. Binance Smart Chain is the greatest option to promote NFT games with all plugins. It provides the best features and faster adoption rates due to its compatibility with Ethereum and its large user base. Binance Smart Chain is fully compatible with the Ethereum Virtual Machine (EVM), which means that developers can easily port their existing code and applications from Ethereum to BSC.

It also means that users can use popular wallets like MetaMask to interact with BSC-based NFTs. Moreover, Binance Smart Chain has a huge and growing community of users who are interested in NFTs and other decentralized applications. Binance, the parent company of BSC, has over 15 million users who can easily access BSC through the Binance platform.

In the future we are planning to do J.V. with other coins in which Binance Smart Chain will provide facilities. Through this, it will give big support to our coin. Binance Smart Chain allows for easy token migration through bridging mechanisms that enable cross-chain interoperability. It also benefits from funding and support from Binance, the world's leading crypto exchange. Binance Smart Chain supports the BEP-20 token standard, which is similar to Ethereum's ERC-20 standard. This means that tokens issued on BSC can be easily transferred to other blockchains that support the same standard, such as Ethereum, Polygon, or Avalanche.

Binance Smart Chain also provides various bridges that allow tokens to move across different chains, such as the Binance Bridge or the Burger-Swap Bridge. Furthermore, Binance Smart Chain receives funding and support from Binance, which has a strong influence and reputation in the crypto space. Binance provides liquidity, marketing, and technical assistance to projects that build on BSC.

COMMUNITY WAR GAME (Web3)

COMMUNITY WAR GAME (Web3) THE NFT GAMING PLATFORM PLAY-2-EARN

Community War is Now Play-to-Earn! It's a unique merger of 3 types of earnings:

- * Proof of Gaming
- * Play to Earn
- * Digital Marketing

Users can start earning CTI by playing Community War.

Available On Play Store for Android Users

<https://play.google.com/store/apps/details?id=com.thirdwar.smsswap.sniper.game>

Community Pool Club (Web3)

The Community Pool Club (CPC) is a decentralized, blockchain-based P2E model pool game that can be played on the web.

- Players are able to participate in Player vs Player matches using cryptocurrency.
- Holders of the CPC's NFTs will have incentivized access to in-game privileges.

Key Features of CPC:

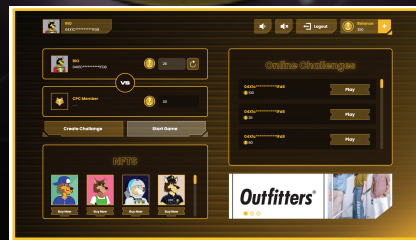

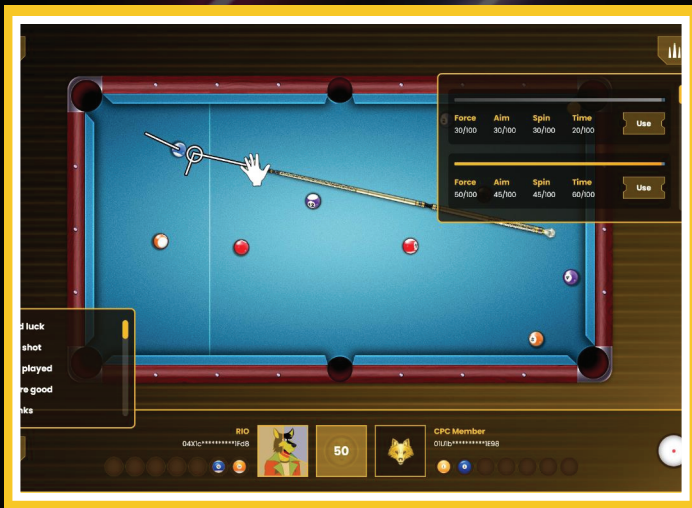

- A fully functional web3, an 8-Ball game that is built on top of a decentralized platform
- A system for players to participate in matches using cryptocurrency

COMMUNITY INU (CTI) WHITEPAPER

- A decentralized ledger that stores all game data to ensure fairness and transparency
- A system for players to view their match history

Token Allocation

The total circulating supply of CTI is 7M and 1.8M CTI are reserved for Community Inu Organization, Founder, Airdrops & Reserve Fund.

Road Map for CTI's Circulating Supply in the Future

First Year: (October 2023 - October 2024)

- * Circulation Supply is only 1M CTI out of 7M CTI
- * 6M CTI (Locked)

2nd Year: (November 2024 - November 2025)

- * An Additional 2M CTI will be available in the market
- * 4M CTI (Locked)

3rd Year: (December 2025 - December 2026)

- * The Additional 4M CTI will be available in the market

COMMUNITY INU (CTI) WHITEPAPER

Phase 1:

- 5000+ Telegram Members
- 10000+ Twitter Followers
- Presale on pinksale
- Onboard Tier 1 Twitter Influencers and Telegram Call Channels
- CMC & CG Listing
- Banner Ads
- To be recognized by TRIPSPATA.COM and Travel Inu as a payment option.
To enhance the use case of CTI so CTI holders can Travel/Vacation using CTI.

Phase 2:

- Tier 1 CEX Listing
- Airdrop
- Launch Web 3.0 game

Our project can benefit from more liquidity and exposure and our community members can feel more secure by migrating to major exchanges. 1st goal is to list our token to one of the major exchanges like Binance, BitMart, Okex, Gate.io, Kucoin, LBank.

Phase 3:

Develop a couple of more NFT games.

Our community pool club (Web3) game can help us attract a bigger community through marketing and then we can use that community to develop a bigger and more sophisticated game network and profit from new games.

COMMUNITY INU (CTI) WHITEPAPER

Develop pool of NFT games

Phase 4:

Develop our very own Blockchain.

Many governments and private sectors in Dubai and worldwide are moving their systems to blockchain. The world is moving toward more reliable, efficient ways. We want to establish our own blockchain so that we can deliver secure services with low transaction costs.

COMMUNITY INU (CTI) WHITEPAPER

Phase 5:

Develop Meta-Tourism Portal

MetaTourism, which is the result of blending the tourism industry with the Metaverse, can be an inventive and stimulating notion. The Metaverse, a virtual reality space where people can interact, investigate, and engage in various activities, can augment the travel experience and provide exceptional opportunities for travelers globally.
